

# 3M™ SelfCheck™ System (V-Series)

[CHECKOUT]

## Self-service with the reliability of Tattle-Tape™ Security

The 3M™ SelfCheck™ System V-Series is a fast, versatile checkout solution that is so intuitive it virtually assures first-time success. Along with an easy-to-use touch screen and step-by-step instructions, the distinctive V design helps customers place items correctly. The system processes books, magazines, videos, CDs and DVDs and provides web-based remote monitoring and diagnostics. It also accommodates a wide range of barcode placements. The V-coil design automatically adapts to power level variations and essentially eliminates unwanted alarms. Additional security features prevent customers from checking out more than one book under a single barcode and substituting items during checkout. With its dynamic design and sharp, contemporary look, the V-Series takes your library to the next level of productivity and service.

### Intuitive User Interface

- Easy-to-use touch screen interface
- Scanner handles almost any barcode location and orientation
- Distinctive V design makes the proper placement of items more intuitive

### Contemporary Design
